

Our Current Coronavirus Response

In light of the potential for spread of the Coronavirus Covid-19 to the Greeneville Community, the Greeneville SDA Church is encouraging a continuing awareness of the overall situation and is taking steps to incorporate the CDC guidelines for disease prevention within our church family.

However, church members who are elderly or have chronic health issues that affect the immune system or lung health may wish to consider worshipping via internet streaming or take increased precautions beyond the current recommendations.

Over 80% of those infected with the virus will have little or no respiratory symptoms, so all of us, young and old need to use extra care, following the information shared below

CDC Guidelines:

- Avoid handshakes and other close contact type greetings
- Carry and use personal hand sanitizing
- Avoid finger to face touching, using tissue that is trashed after use, and hands cleansed
- Cover coughs and sneezes with a tissue or use the inside of your elbow.
- Stay home when sick.
- Wash hands often for at least 20 seconds.
- Limit close contact with others as much as possible (about 6 feet).

All need to appreciate the health message given the SDA Church and practice it more than ever to ensure a healthy immune system: eat healthy foods, get regular exercise, expose yourself to some sunlight, get some fresh air, and adequate sleep, etc.

Finally, let us pray for the spiritual and physical health of our community.
“For God has not given us a spirit of fear, but of power and love and of a sound mind” 2 Timothy 1:7 (NKJV)
